WALL & FLOOR TILE COLLECTION

We stock everything you'll need for the perfect tiling job

We don't only offer a fantastic range of wall and floor tiles we also have everything you'll require for the perfect finish to your tiling project. From electric and manual tile cutters to silicone sealants, cleaners and sealers to tile spacers we even stock a range of protective equipment. You can be confident that we'll have everything you will need!

ADHESIVES • GROUTS • PRIMERS • WATERPROOFING • ELECTRIC TOOLS • TROWELS • FLOATS

GUIDE TO WALL & FLOOR TILES

The sizes listed of all our wall and floor tiles are a nominal sizing and can sometimes vary inside a box and between batches and colours. Due to the firing process in the manufacturer of tiles a certain size tolerance is deemed acceptable providing adequate spacing is applied.

Our floor tiles are sourced from around Europe and therefore, are all graded slightly different depending on the factory from which they came from. Please see the description next to the tile to see whether or not the tile is suitable for your application. Please be aware that the tiles resistance is not only influenced by these descriptions but also by where it is laid. For example, an area that is subjected to a lot of gravel or grit will deteriorate the tile quicker over time than a clean environment.

Some of our tiles are tested by the manufacturer for slip resistance using method DIN51130. Listed below are the tile ranges within this catalogue that have a slip-rating.

For outside spaces, to determine whether a tile is suitable for use depends on how much water it absorbs. As a general rule Glazed Porcelain and Through Bodied Porcelain are suitable. However please ask for advice when purchasing.

Please note, all floor tiles can be used on walls providing substrate is suitable for the weight of the tile including the adhesive, again please ask for advice if you have any queries.

All tiles can be prone to "bowing," this is caused in the firing process and is unavoidable. All our tiles are produced to comply with European standards and tolerances. Ensure that you are happy with the finish before laying commences especially if you are planning to lay the tiles in a brick style.

To help keep your tiles in the best condition possible, we recommend the use of Lithofin cleaning products and sealers for all our natural products.

Guide to Slip Resistance Ratings

R9 Anti Slip Rating

Provides minor resistance to slips, making them best suited for use in dry internal spaces such as dining rooms. If using in a bathroom we recommend a bath mat for stability.

R10 Anti Slip Rating

Will provide minor to moderate resistance to slipping, ideal for use in hallways, kitchens, and other living spaces including bathrooms and some commercial applications.

R11 Anti Slip Rating

Will provide moderate resistance to slips, and can be deemed safe for use in almost any interior space. This includes kitchens, bathrooms, wetrooms and some commercial applications.

R12 Anti Slip Rating

R12 is the minimum recommended slip rating for tiles that are to be used in business, industrial and public settings, or any instance in which tiles are needed for a sloped surface.

Featured Tiles with a non-slip rating

| Tile Range | Rating | Page | Tile Range | Rating | Page | Tile Range | Rating | Page |

FASTNET^{TRADE}

150W/m² MATS

10 Year Warranty

Our Fastnet Underfloor Heating Mat is designed for use under stone and ceramic tiles. The heating cable is fixed to a tough fibreglass mesh with an adhesive back which securely binds the mat to the subfloor.

It is the ideal solution for regular shaped rooms. The mesh (but not the wire), can be cut to fit the shape of the room.

The heating cable is a durable single strand, dual core heating cable with a 3 m coldtail.

FEATURES

- 3 mm single strand, dual core and double insulated heating element.
- Sticky fibreglass mesh for extra durability and secure installation.
- *Quick installation* - Simply roll out mat with pre-spaced wire.
- CE and UKCA marked meeting the highest safety standards.
- 10 Year Warranty

SUBFLOOR

Recommended Floor Construction

1. Floor finish
2. Flexible tile adhesive or levelling compound
3. Insulation Board
4. Flexible Tile Adhesive
5. Subfloor

POPULAR CHOICE

Palio Rigid planks have a click-locking system with a rigid core construction suitable for installation over uneven subfloors.

Palio LooseLay planks and tiles have a friction grip backing which secures the floor firmly in place using a combination of weight and friction.

Palio Gluedown is available in both 0.3mm and 0.55mm wear layer, making it suitable for both residential and commercial application.

PALIO CORE

QUICK AND EASY TO FIT

INSTALLS OVER MOST EXISTING HARD FLOORS

REDUCES IMPACT NOISE TRANSFER BY 19dB

PATENTED CLICK-LOCKING MECHANISM

Quick and easy to install, Palio Core combines a simple click-locking mechanism with a rigid core construction which provides more robustness on uneven subfloors. With it's acoustic foam backing, it can reduce noise transfer by 19dB.
